PRINCE BAVISHI

Full-Stack Developer
Ahmedabad, India | +91 9016091157 | bavishiprince90@gmail.com | LinkedIn | prince-bavishi.netlify.app

SUMMARY

Full-Stack Developer with 1+ year of professional experience building and maintaining production SaaS applications. Skilled in Angular, TypeScript, React, Node.js, Express.js, SQL, MongoDB, and REST APIs, with experience delivering frontend features end-to-end, debugging across application layers, and working collaboratively in Agile environments. Actively uses AI-assisted development tools and GitHub-based workflows.

SKILLS

- **Languages & Core**: JavaScript, TypeScript, SQL, HTML5, CSS3, SCSS, OOP, Debugging
- **Frontend**: Angular (14–18), Angular Material, RxJS, React.js, Tailwind CSS, Redux, Bootstrap 5
- **Backend & Database**: Node.js, Express.js, RESTful API Design, MongoDB, MySQL, PostgreSQL, Supabase
- **Tools and Ai**: Azure, Git, GitHub, Postman, VS Code, Agile/Scrum, Perplexity, Lovable, ChatGPT, Cursor, Claude, Kiro, Antigravity

EXPERIENCE

Softrefine Technology Pvt. Ltd. **May 2025 - Present**
Software Developer

- Develop and maintain a production-grade enterprise SaaS application using Angular, TypeScript, JavaScript, HTML5, and SCSS within an established architecture and complex business workflows.
- Own frontend feature delivery end-to-end, from clarifying requirements and implementing UI/UX to integrating RESTful APIs, handling edge cases, debugging, testing, and shipping production-ready features.
- Implemented new features and enhancements across multiple product modules, integrating REST APIs and working with existing components, shared services, and business logic while maintaining application stability.
- Investigate and resolve production and QA-reported defects by tracing issues across UI, API responses, asynchronous flows, and business logic, while performing functional, regression, edge-case, and API testing with Postman.
- Worked with Azure DevOps and Agile/Scrum workflows for ticket management, sprint tasks, bug tracking, acceptance criteria, and development-to-testing handoffs, collaborating with developers, QA, and product stakeholders through release.

KEY PROJECT

AI Factory OS - Manufacturing & Distribution Management Platform

- Personal Full-Stack Product; PEAN Stack (PostgreSQL, Express.js, Angular, Node.js), PrimeNG, RxJS, Signals
- Designing and developing an end-to-end full-stack infrastructure platform for manufacturing operations, covering the complete business lifecycle from CRM and quotations to sales orders, inventory, procurement, production, and dispatch.
- Architecting interconnected frontend and backend workflows such as Quotation → Sales Order → Inventory Analysis → Purchase/Production → Dispatch, with role-based access and module-specific responsibilities.

Online Real Estate Service Provider - Real Estate Management Platform

- MERN Stack | MongoDB, Express.js, React.js, Node.js, Tailwind CSS
- Developed end-to-end features for a role-based real estate platform, supporting customers, sellers, agents, and administrators across property and listing workflows.
- Built responsive React interfaces and RESTful APIs using Node.js and Express.js, integrating frontend workflows with MongoDB for persistent data management.
- Worked across frontend and backend layers to implement features, debug application issues, fix API/data-flow problems, and perform functional testing to ensure reliable application behaviour.

EDUCATION

Dr. Babasaheb Ambedkar Open University **2025 - 2027**
Master of Computer Applications (MCA)

Kamani Science College & Prataprai Arts College, Saurashtra University **2022 - 2025**
Bachelor of Computer Applications (BCA)

- **GPA:** 8.36 CGPA
